Subject: Sagitta Upgrade - Cert Redesigned Training Session questions

The last training session was done on 11/17/10. Here is a compilation of the unanswered questions from all sessions, and the responses. Unit Managers, please forward to your staff who attended the training.

#1

Question: When do we x out the Addl Insd box in the umbrella & excess section of Acord 2009/09? Do we always x it out if the underlying GL has the A/I, either by separate endorsement or within a blanket endorsement verbiage?

Response:

The "x" depends whether the Umbrella provides it or not. Always go back to the policy provisions to guide you.

#2

Question: Same question for waiver of subro on umbrella/excess section.

Response: Same.

#3

Question: Can we have a "clue" in the description of ops that pulls thru on cert – so we can x a box for waiver of subro, since the wording will be removed?

Response: These will be entered as a selection "clue" & must be removed before printing a cert.

REMOVE BEFORE PRINTING: x box GL policy waiver of subro

REMOVE BEFORE PRINTING: x box WC policy waiver of subro

REMOVE BEFORE PRINTING: x box Umbrella policy waiver of subro
